1.1.2.7.2.1 19th century

On February 22 (or March 24) in 1803 local fishermen reportedly saw a vessel drifting in close by waters. They say when they investigated it, "a beautiful young woman" they described as having red and white hair and dressed in strange clothes appeared. The fishermen claim she held a square box "that no one was allowed to touch" and she spoke to them in a language they never heard before. Some UFO believers think this story was a credible document of a close encounter of the third kind in Japan. Historians and Ethnologists consider it folklore.

"To my way of thinking, there is every bit as much evidence for the existence of UFOs as there is for the existence of God. Probably far more. At least in the case of UFOs there have been countless taped and filmed and, by the way, unexplained sightings from all over the world, along with documented radar evidence seen by experienced military and civilian radar operators."
